## Work History

Full Stack Web Developer

Project Details

[Tech Mahindra Limited, Chennai, India](#)

JUL 2012 – MAY 2016

**Plan Systems – Web API (RESTful Web API, Node.js, Entity Framework, SQL Server)**

- Adopted Existing Business logic using RESTful Web API, which saves up to 70% cost & efforts.
- Implemented dynamic routing solution using Attribute Routing, so we can support all URI patterns.
- Utilized node.js to implement the Progress bars for the application to provide real time update to user.

**Plan Systems – Web Application (ASP.Net MVC 5, HTML 5, CSS3, Responsive UI, Bootstrap)**

- Devised a cost effective lightweight ASP.Net MVC architecture to Consume Restful Web API.
- Designed and developed Responsive UI based Web interface using HTML 5, CSS3, and Bootstrap.
- Constructed the core financial module where more than 5 million transactions are made every month.

**Communication Tracking System – Web Application (ASP.Net 3.5, WCF Web Service, jQuery)**

- Implemented the SEPA (Single European Payment System) for 8 different European Cultural Settings.
- Developed dynamic XML file structures, where user can design their own XML file format structures.
- Implemented number of Crystal Report based consolidated reporting solutions.

[FavorMe App, Phoenix, AZ, USA](#)

JUL 2014 – PRESENT

- Implemented REST services to support iOS and Android App. Sending notification via GCM and APNS.
- Designing strategies to add a geo-fencing around the user with selected radius plus LONG-LAT details.
